Physical/Occupational Therapy Prescription Name: ______Date of Birth: _____ Diagnosis: Proximal Humerus Fracture Code: \$42.209 Procedure: Open Reduction and Internal Fixation Surgery Date: Instructions Range of motion: Begin pendulums and gentle passive and active-assisted range of motion immediately, emphasizing forward elevation. Do not initiate strengthening or active range of motion until six weeks post-operatively and cleared by Dr. Chalmers. Strengthening: Begin strengthening at six weeks post-operatively, starting with isometrics and progressing to bands and then weights, with a focus on the scapular stabilizers, rotator cuff, and deltoid. Please provide and emphasize a home exercise program. This program should focus on: o Regaining active forward elevation (pulleys, wall climbs, table slides, etc.) o Regaining external rotation using passive and active external rotation exercises (canes, door frame stretches, etc.) Ok to return to light athletic activities at three months if full range of motion has been recovered, heavier athletic activities at four months.

Modalities

Heat before and ice after therapy.

Frequency: 2 times/week Duration: 6 weeks
